Customer Reviews

With more than 200,00 copies sold, 'Monthly Interest Amortization Tables' is the preeminent guide to calculating loan payments of any kind. This handy, extensive manual allows you to quickly and simply determine: Payments on loans of \$50. to \$300,00 at interest rates of 2% to 27.75% for up to 40 years.. Monthly, quarterly, semiannual, and annual payment tables for a \$1,000 loan.. Remaining balance tables showing what percentage of a loan remains unpaid at any given time. Proration tables based on both a 360-day and a 365-day year.

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

This is not a book that you are going to read before bed or curl up on a cold winter night with. It is a book of tables but when you need them you have them. It is true that many financial calculator programs but most people don't know how to use them and besides this is quicker!

I needed an amortization book that goes down to the current interest rates. This one fills the bill.

Very complete and should endure a wide scale of economic conditions.

This is great. It's so handy for me to just reach up to my bookshelf and quickly find mortgage payments for any interest and for any number or years I want to know about....

This book was suggested to me based on recommendations from a friend. I got it not knowing what to expect but it was exactly as he said and very precise with info. If you are looking for it to have words don't purchase it. It is literally a breakdown table for interest and loans.

just what we were looking for !

okay.

Font is too, too small - unless you like using a strong magnifying glass. Approximately half the pages are totally wasted on amortization tables of 10% to 25% interest. Recommendation: If you want a current, quick reference that's easy to read, don't buy it.
