National Geographic Kids Everything Robotics: All The Photos, Facts, And Fun To Make You Race For Robots

Synopsis

They fix spacecraft, dance, tell jokes, and even clean your carpet! From the tiniest robo-bees to gigantic factory machines, robotics is all around you. This technology isn't just for science-fiction anymore -- it's real and more relevant than ever. With stunning visuals and energetic, impactful design, readers won't stop until they've learned everything there is to know about robotics.

Customer Reviews

Gr 4-6 "These titles are designed for casual browsers and more serious readers alike. The four chapters, introduction, and afterword offer a planned route through these ambitious overviews, while the mini-bites of information keep them friendly. Chapter 3 in Robotics, "Robo-Helpers," shows real-world robots in homes, in factories, underwater, and in outer space. A "Robotic Comparisons" spread of robot and human features ends the chapter. Chapter 2 in Sports, "Dribble, Drive, Hustle," introduces four popular sports—basketball, baseball, hockey, and football—and closes with a photo gallery of less mainstream sports. Each volume features insights from a professional in an "Explorer's Corner"—Sports offers the expertise of sports reporter Shalise Manza Young and Robotics provides knowledge from National Geographic Explorer Shah Selbe. These colorful selections are crammed with quality photos, including the dynamic full-spread images on

chapter-title and closing pages. An "Interactive Glossary" in each book adds a bit of fun to learning vocabulary words with a quick related multiple-choice question after each definition. VERDICT These resources present accessible fun; both will find eager audiences.â Carol S. Surges, formerly at Longfellow Middle School, Wauwatosa, WI

JENNIFER SWANSON is the author of over 14 nonfiction books for children. She specializes in writing about science and technology. Her children's book *Body Bugs: Invisible Creatures Lurking Inside You* was a 2012 Book of Note with the Pennsylvania Librarian Association. Jennifer has her M.S. Ed in K-8 science, is a middle school science instructor, and lives in Jacksonville, Florida, with her family.

The coverage of the subject is good, but the formatting is a little bit cluttered. My son really enjoys it though.

My son loves it. Lost of great photos and information about his favorite subject. Also it sent us online to the National Geographic Robotics website which he thoroughly enjoyed.

Quick delivery of item. My son loves the book. There is all kinds of great information.

Just what I expected.

ok

Sons love it

Everything Robotics was a gift to our family. My nine-year-old daughter devoured it. My seven-year-old son repeatedly studies it. (He reads beyond his age level.)Jennifer Swanson filled this 64-page gem with fun, geeky facts relevant today. The quick facts are paired with great photographs. The author explains EVERYTHING ROBOTICS in a way that children love. The writing style is fun and friendly, while very informative. I certainly learned plenty, too.The way my children return to the book repeatedly shows me they keep learning more about robots every time they read it. Robots are part of our everyday lives, even when we don't realize it. I highly recommend Everything Robotics.

This is the coolest book about robots I have ever read. Author Jennifer Swanson along with National Geographic Explorer, Shah Selbe tell us and show us everything you ever wanted to know about robots since the beginning of their being brought to life. Besides, the cool facts throughout the story, there are brilliant back matter facts to check out by other amazing people who work with and create robots.
