# House Of Robots (House Of Robots Series Book 1)

## Synopsis

In this new highly-illustrated series from James Patterson, an extraordinary robot signs up for an ordinary fifth grade class... and elementary school will never be the same! It was never easy for Sammy Hayes-Rodriguez to fit in, so he's dreading the day when his genius mom insists he bring her newest invention to school: a walking, talking robot he calls E--for "Error". Sammy's no stranger to robots--his house is full of a colorful cast of them. But this one not only thinks it's Sammy's brother... it's actually even nerdier than Sammy. Will E be Sammy's one-way ticket to Loserville? Or will he prove to the world that it's cool to be square? It's a roller-coaster ride for Sammy to discover the amazing secret E holds that could change family forever... if all goes well on the trial run!

## Customer Reviews

Great book! My gifted 6 year old read the whole book in one day! He loves reading and re-reading all kinds of books and this one he just couldn't put down! Illustrations are funny and keep him interested. Reading is not too challenging for him. The next book comes out today, we already

ordered it and now it's on the way! Just in time for Thanksgiving break!

These books by James Patterson are such a refreshing change from the junk in the young reader set. They are pleasant to read to my kids, and they like to read them on their own once they can. The illustrations are a real draw.

My nephew lit up when he saw this book! He'd read the others in the series and couldn't wait to dive into this one.

My 8 year old son loves comics! Thought it might be a fun book. She hasn't read it yet.

We, my After-School Techies LOVE the entire series!

10 year old grandson loved it.

My son loves this book
