Rod Powers retired from the United States Air Force with 23 years of service, 11 of them spent helping to solve the problems of the enlisted corps as a first sergeant. A world-renowned military careers expert, he has advised thousands of troops about all aspects of U.S. Armed Forces careers.

My son purchased this item after taking a practice test for the air force and not receiving a very high score (19). After reading this book for about a month he re-took the test and scored a 36! Big improvement! He is going to continue to read it and get his score even higher next time!

I got a 48 on the practice test. Got this right after and studied for two weeks and got a 56 on asvab. Im in airforce and my mage scores in practice was m40 a50 g47 e59 after taking the real test my

mage was a lot better m57 a54 g63 e73. As you can see there was a big difference and now in leaving next month to bmt.

Great book. The online tests are an amazing extra touch, well worth the money if you are wanting to study to take the ASVAB. Has all of the information in it that you would need for the test, plus some.

good

Excellent book! For those of you who haven't seen any equations or math problems for years, this is an excellent refresher. It explains and teaches you how each problem gets solved as well as prepares you to what you should expect to see in the Asvab. My scored improved by 30 points after studying from this book.

Great condition

This is the most incomplete study guide I have ever seen. It asks you test questions which are very often not even covered in the pre-study sections of the chapters. In addition, it leaves out key formulas in the study sections, and, particularly in math and physics-related questions, they often times leave out the key steps in order to properly solve the problems (in the answer explanation sections following the practice questions). Basically, I feel like I have been ripped off of money AND time by getting this book.

This book did a wonderful job preparing my daughter to take the ASVAB to join the US Coast Guard. It helped her in areas where she had limited knowledge such as mechanics and electrical engineering. She scored the highest score on her testing date and was able to join the coast guard without any problems.
