Synopsis

The International Baccalaureate® (IB) was founded in Geneva, Switzerland in 1968 as a non-profit educational foundation that endeavored to develop inquiring, knowledgeable and caring young people who would go on to create a better and more peaceful world through intercultural understanding and respect. What began as a single program for internationally mobile students preparing for college has grown into a series of programs for students up to age 19.

Barron's is pleased to offer a brand new course review and exam preparation guide for the IB Mathematics SL exam. The content of the book is based on the subject guide, published by the International Baccalaureate Organization. It covers all topics required for exams beginning in 2014 and includes:
A full-length diagnostic test with markscheme and fully explained answers
Study tips and exam strategies
Topic review and practice for each strand of the IB Math SL curriculum, including explanations and examples as well as problem sets with fully explained solutions
Two full-length practice exams with markschemes and fully explained answers
This all-encompassing book can also serve as a supplement to classroom instruction throughout the two-year IB Math SL course, a resource for the Internal Assessment project, and a review resource during first year college math courses.

Great for review and for making sure you cover all the necessary information. This was great to use as a checklist and a confidence booster. You definitely need other notes, internet videos, and a great teacher to complement the book, as it is not a comprehensive textbook. Definitely recommend as a review studyguide.

Seems like a good book covering all the Math SL topics. It looks like it provides a concise summary of the whole course, which is great. Just got it yesterday. Will know better as i start using it.

I have been truly struggling to work in maths and I find this book very helpful. All notes on the chapters taken at ib sl math are helping me get better results in math.

Allowed my son to hit the ground running.

This is the book my kids IB school is using. Nice to have our own copy at a reasonable price.
