Nanostructured Photocatalysts: Advanced Functional Materials (Nanostructure Science And Technology)

Synopsis

While books on semiconductor TiO₂ photocatalysis are legion, nanostructured controlled photocatalysts are attractive beyond standard semiconductors, and this book is devoted to the many novel uses of advanced TiO₂ and MOF-based photocatalysts. Details on synthesis, characterization, and reaction applications of nanostructured photocatalysts are summarized. Other new materials discussed in this book are Bi- W- oxides, metal complexes, and unique porous materials. This book contains methods of preparation and characterization of unique nanostructured photocatalysts, and details about their catalytic action. Contributors to this volume are leading Asian researchers in Photocatalysis. It will appeal to researchers wishing to know how to design new types of photocatalysts with controlled nanostructures.

Book Information

Series: Nanostructure Science and Technology

Hardcover: 544 pages

Publisher: Springer; 1st ed. 2016 edition (May 4, 2016)

Language: English

ISBN-10: 3319260774

ISBN-13: 978-3319260778

Product Dimensions: 6.1 x 1.2 x 9.2 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)
