Applied Pharmacology For The Dental Hygienist, 4e

Synopsis

Provides up-to-date, accurate information on some of the most important topics for dental hygiene students, including antineoplastic drugs, respiratory and gastrointestinal drugs, hormones, and drugs used to treat common oral entities. The book is organized into four sections that deal with the basic principles of pharmacology, drugs grouped by class, maintenance drugs, emergency drugs and what effects pregnancy and breast feeding have on dental treatment, drug interactions, and drug abuse. Numerous tables and colorful graphics are included.

Paperback: 640 pages

Publisher: Mosby; 4 edition (January 15, 2000)

Language: English

ISBN-10: 0815136307

ISBN-13: 978-0815136309

Product Dimensions: 9.1 x 7.5 x 1.1 inches

Shipping Weight: 2.4 pounds

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #5,706,151 in Books (See Top 100 in Books) #88 in [Books > Medical Books > Dentistry > Pharmacology](#) #222 in [Books > Textbooks > Medicine & Health Sciences > Dentistry > Dental Hygiene](#) #397 in [Books > Textbooks > Medicine & Health Sciences > Dentistry > Dental Assisting](#)

Customer Reviews

This text does an excellent job of summarizing and organizing the drugs that dental health care workers will prescribe as well as the common groups of medications that patients will be taking that will require modification of the dental treatment or possible interaction between these two groups. Although there are some errors in the text, it is very easy to read and is literally packed with good information (in other words - throw away the highlighter. There's really not much filler because health topics are really well-summarized). I enjoyed reading this text and recommend it to any dental hygiene student or even dental student wishing to learn as much as possible in the minimum number of pages / hours necessary.
