Like I said, it cost a lot, but the text is really good. The book goes into good detail and it has been my pub of choice.

This textbook updates the old Schweizer Helicopter Pilot Manual, but is not an upgrade. The HPM was perfect; the HPT is glossy and colorful, which is more about marketing than substance. Even though the contents are almost exactly the same as before, I actually have a much harder time reading the HPT than the HPM it replaced, because now the pictures distract from the words. Somehow this (and a few new additions--Magnus Effect, GPS...) is supposed to justify doubling the old price? I'd like to see Jeppesen go back to the old style, unflashy, well-written, relatively

affordable textbook, and leave the glossy picture books in the children's section.

Great info but book needs revised and modernized.
