I use these books for homeschooling to start off each of the required 180 days. It helps me to keep track of how many days we have done and it allows me to see what we have done in math each day. Each page has different types of problems, so the kids don't get bored. They are truly grade appropriate work. The additional CD is nice, so you can print out pages again and have a file on hand. These would be truly great for "morning work" activities for teachers. Would definitely buy these each year. I just wish they made them for spelling, language arts science. etc.

I homeschool my kids and use these books to ensure that they learn what is needed to meet the requirements for standardized tests. When they get stuck on a problem, we pause and have a math lesson.

This is perfect. Every page or day holds a variety of skills reviews and problems for quick checks or practice. I love that it continues to review skills rather than only focus on one or two. The continuous format is easy to use and use for tracking student progress.

Love this book, great for summers to keep the kids up on there math skills and also great for working on the up coming years math early! Was easy to understand and do!

Purchased to supplement my child's homeschool. Will be invaluable helping me diagnoses and narrow down where her troubles are!!!!

This is my favorite math review book to date. I have already bought the next grade up to have on hand.

I use this all of the time.

Perfect for spiral review homework.
