## Customer Reviews

(Disclaimer: this review is based on reading this book on iPod Touch using Kindle App, not on Kindle reader.) The problem with this eBook is that the table of countries is not linked to locations within the eBook. (Actually, there seem to be no links in the book at all). What that means is that you can't jump right to the country that you want to read about. Instead, you have to painfully either fast-scroll pages or keep jumping to numbered book locations. After fast scrolling or jumping, you need to scroll around to see what country you landed in... and repeat until you find what you were looking for. Also, this book is text-only.

It may be my fault for not having the right instincts to use this book. It appears to be completely lacking in organization other than A is for Afghanistan. I could never find anything resembling a Table of Contents. A compendium with this much content needs a search engine on the second page. I gave up on finding how to use this book.

It depends on how you'd use it. If you want to travel the world, particularly to obscure and off the beaten path places, this would be excellent. It provides a lot of the basic facts about the country that

are significant for day to day safety and the culture you'd enter. It is more a reference book than something you'd likely to read cover to cover. Nevertheless, it offers a lot. Just not my favorite type of book.

I bought this book with great hopes... CIA behind such a grand reference publication of all times etc. But what a disappointment. No index. No links to any chapter / country. One just keeps scrolling page after page of dull text for finding any reference. World's great minds at work, truly! Better make use of your Kindle's web browsing and refer to the CIA website. 99 cents gone down the drain ;) P.S. No maps. Keeps getting better.

good book

frustrating and a total waste of money. table of contents does not work, there are no maps, no way to navigate. they should not be selling this as it is basically a defective product on the Kindle.
