I'm sorry but I was under the impression this book had actual strategies to help save and plan for taxes. After reading the book in just a few hours, the underlying theme in each chapter is that one needs to consult with a Certified Tax Coach in order to develop these strategies. Each chapter was very basic and touched on a few tax saving tips very lightly and then the answer was to discuss with your Certified Tax Coach in order to take advantage of these tips and others that may be available. As a small business owner, I do not think anything was presented that I am not currently doing or at least have not heard of.

This is a very helpful book. As a person who has started an LLC with a partner, I found Chapter 2 extremely insightful with respect to starting a business. I highly recommend for all types, individual as well as business owners!

Everyone can benefit by this book!

Wonderful great information

good book

Very informative! Highly recommended.

Great publication! This is a must have for anyone that files a income tax return. Even those of you who hire a CPA it never hurts to study the IRS rules to protect yourself. Keep in mind not matter who prepares your return you are responsible for the correctness of the return and you alone will be fined for errors.

I purchased this book because my tax advisor, Patrick O'Hara, is one of the contributing authors. Although I have worked for a CPA for the past 15 years, I was amazed at the different strategies that are available to small business people. I had never even heard about the section of the tax code that Patrick wrote about until reading this book. I think this book is a handy guide for small

business owners and should stimulate them to ask the right questions and find the right tax advisor for their situation.
