Exploring Creation With Chemistry Full Set With Solutions And Tests

Synopsis

Prerequisites: Algebra I This is a two book set that includes both the student textbook and the Solutions and Test Manual. In order to be able to understand this text, the student needs to have completed algebra I. This course is designed to be a first-year high school chemistry course and gives the student a rigorous foundation in chemistry, in order to prepare him or her for a college-level course. The course covers significant figures, units, classification, the mole concept, stoichiometry, thermochemistry, thermodynamics, kinetics, acids and bases, redox reactions, solutions, atomic structure, Lewis structures, molecular geometry, the gas laws, and equilibrium. Students who take and understand this course will be very well-prepared for a tough university chemistry course.

Dr. Jay Wile is wonderful. You can almost hear him say, "best beloved" when reading this book. Chemistry is not easy in the best situations, but with this book you can get through it. So whatever book you have to use in your chemistry course use this one too. It will help you to know what is really important and it will explain it to you in layman's terms. With this book along side any book, any student can make an A. Thank you for making this book available.

Apologia Rocks! This is the best science curriculum going. I want to try the ones for the younger ages and see what they are like. I HIGHLY recommend this text.

Designed to educate a well rounded understanding of Chemistry and not just prepare for a test. The material is designed for deep thought and practice in a context of a Faith understanding.

Received as described.

this was a much cheaper place to buy these science books. we love apologia and w/ more than one child, we're always looking for the best price.

Should change your heading which reads Full Set w/Solutions and Tests. I had to order that from someone else. Not satisfied with this business.

product was exactly as described

It's very thorough and challenging. Thank you for including all the resources needed for someone who's seen a lot of years since college chemistry!!!
