Customer Reviews

I have read the Slaver wars entire series. Finished last night. These books were great casual military science fiction writing. The author did a great job of character interaction and development, Story lines that were not overly complicated and came to reasonable logical conclusion. Very solid story telling. Easy transition from one book to the next. Loved it. I now started the next series.

I expected better from a writer like Raymond L Weil. It resembled a children's novel, shallow, formulaic and with dialog that was stilted and un-realistic. It was as if the players were reading from a script rather than talking naturally to each other. The grammar checking and syntax errors were annoying, but I have come to expect them from these type of quickly written e-books. The story has tremendous potential, which is why I will persevere with the series. Also, it was written as short

stories, which may explain the shallow characters and rapid pace of the stories. I hope the writing gets better.

Wow just LOVE this series of books! The concepts are great, the tech isn't overwhelmingly complex or absurd, the aliens cool compared to most of these types of stories. Doesn't get much better than this! MORE PLEASE! AAA+++

Story is OK, if you're a 7-8th grade reader. The wording is so basic and the characters are so poorly established that it seems a shame with a good story line like this one. One of the characters is so timid that his initial decision to go to the moon would be seriously in doubt. Not my favorite book and I doubt I would purchase any future volumes.

I bought all seven of the books, but this should probably not be read. It is poorly written and comes from a different point of view than the other books. All of the books are a bit young adult in both writing and attitude. Too much repetition.

good product, as advertised

I thought this was going to be adult science fiction but it's really for young adults and is a good introduction to science fiction, but I doubt the series will hold my attention. Way too basic, and the concept that there is another "human" species identical to humans on earth who think the same as we do is too unbelievable for me.

Well written but not a great write...the story has plenty of concept but few explanations as to how they got there...and the two main characters Jason and Greg are complete wusses in that they have to ask mommy's permission to go to the stars and Greg seems to have coward written all over him...explorer of the Galaxy? Not one chance in HELL!
