I needed this for a graduate level ethics class.

The guide was very clear and precise in providing information that I needed to complete a school project. I was very pleased with the style of writing, because it was not too technical, but easy to understand. I would definitely recommend it to others.

I loved this book. If anyone forget what ethics is this is just a great reminder. This should be on

everyone's DNA, code of conduct sometimes are no longer being followed or just forgotten.

These miniture guides are ok, but you can go to Richard Paul's website and get them for a significantly lower price. They're made out of construction paper and staples. \$10 for this is way too high.
