# After 50,000 Miles

## Synopsis

Hal and Margaret Roth have lived aboard their cruising yacht for many years, travelling over 50,000 miles across the oceans of the world, and facing many practical problems. This book provides information that anyone contemplating a life of sea-going adventure should consider before setting out. --This text refers to an out of print or unavailable edition of this title.

## Book Information

Hardcover: 329 pages

Publisher: W W Norton & Co Inc; 1st edition (May 1977)

Language: English

ISBN-10: 0393032027

ISBN-13: 978-0393032024

Product Dimensions: 1 x 6.2 x 9.5 inches

Shipping Weight: 1.8 pounds

Average Customer Review: 4.6 out of 5 stars 6 customer reviews

## Customer Reviews

The book is great. Hal Roth is a guy that has done it ....not just talked about it. His perspective about seamanship, equipment and safety are very valuable if you are going to attempt a Blue Water crossing. I will say that the book is a little dated in some areas .....remember he did a lot of sailing in the 70's. Things have progressed rapidly over the last 40 years with GPS, Sails, boat construction and basic equipment even though sailors still face the same safety issues like anchoring in a strange port. The perspective is valuable because it allows you to see the history of sailing and what real sailors had to go through during long passages. It will give you a real appreciation for the technology available today. It's a great book.... enjoy it!

Tips and tricks to keep you alive while in the Blue Water.

I was disappointed with this book as I have "How to Sail Around The World" by the same Author. Which is a reprint of the same book. I thought I was going to get a more in depth informative book

I'm still reading this book and learning gobs from him. Guess he should know a bit after sailing 50,000 miles!

After 50,000 was a book I read before I embarked on my own circumnavigation. As always, Hal Roth gets to the nitty gritty of his subject in an engaging way, and offers advice on every topic of concern to the sailing adventurer. From anchoring to food prep, this book will give any would-be adventurer concrete advice on how to prepare, what to take, and how to manage when you get there. It is a realistic look at the risks involved in crossing oceans in a small boat coupled with risk management strategies. From an age before satellite navigation, cell-phone-at-sea connections and daily blogs from the middle of the ocean, Roth demonstrates old fashioned self reliance. This is a worthwhile read for anyone contemplating shoving away from the safety of the land. Voices on the Wind

After 50,000 Miles: This was actually the first Hal Roth book I ever read -- I picked it up in a used book store and it was a fortunate acquisition! This is Hal's recounting of their cruising in the first "Whisper." Well worth the read. The things they go through, the problems, the good time -- it all paints a very engaging picture. Hal and his wife Margaret have had some really great adventures and their accounts are never dull. Their interests and the way they explore them, make a great read! What else can I say? Buy this book?
