LLOYD WRIGHT, AUTHOR attended University of California, Los Angeles (UCLA) for undergraduate work in Anthropology and continued his formal education at Cal Lutheran University in Thousand Oaks, California where he majored in Administration of Justice. Lloyd's background in Natural Medicine began early in life, as his mother was the Health Food Fanatic of the 1950s. Lloyds longstanding interest in Natural Medicine was further fueled as nearly everyone in his family has had cancer and most have died from it. Lloyd contracted Hepatitis C in 1979 from blood transfusions and in 1991 he was diagnosed with Malignant Testicular Lymphoma. After an onslaught of surgeries and conventional radiation treatments, Lloyds liver was severely compromised. In 1994, he was diagnosed with Hepatitis C, and after Interferon failed, the medical

establishment advised Lloyd to get his papers in order, expect to live another 3 to 5 years and hope something would come along to help. Standing up against a legion of medical doctors who insisted Interferon was the only way, he researched the disease and proved them wrong. Through extensive research, and his studies with the highly regarded John Finnegan, ND, Lloyd created a combination of herbal and glandular remedies that cured him completely of Hepatitis C. His successful cure coupled with the trauma he experienced while in the hands of medical doctors, spurred him to write a book documenting his story and his cure, *Triumph Over Hepatitis C*. This book has received worldwide recognition and is helping thousands of people to heal themselves. As a Hepatitis researcher and author, Lloyd has developed more substantial credentials than most doctors or scientists who are often paid by big drug companies. Since the publication of *Triumph Over Hepatitis C*, which has become a bestseller on the web, Lloyd has generated a client base of over 30,000 infected individuals who continually report that their health is now greatly improved or that they no longer have the disease at all. Through his website, [Alternative Medicine Solution .com](http://AlternativeMedicineSolution.com) he provides one of the most successful Alternative Medicine Pharmacies on the internet, which provides life saving, superior quality products to both doctors and patients for Hepatitis C, Cancer, Autoimmune diseases and more.

I own all 3 of Lloyd Wright's Hepatitis C books, and this one is different from the others and is worth getting. I like that Mr. Wright has condensed his useful knowledge regarding supplements, what bloodwork to get done, which foods to eat or not eat, etc., and put that info in this smaller volume that is more accessible than his other longer books. I really did learn some new things from this book, and am glad I bought it. The blood tests section is especially useful, I love that he lets us know that beyond the usual ALT/AST/Viral Load, there are other tests we can have done to monitor our liver progress. Most of these tests are ones that doctors will not routinely check for unless asked. I gave it 4.5 stars because even though I like that the book is shorter (140 pages), it was so good that I was left wanting more info! I would have liked it to be a little longer. Also there is no index. I do realize that due to the size of the book, for some an index may not be necessary, but it's so much easier for me to look in an index and go right to the page I want. Overall, a good and very useful book. Thanks Lloyd Wright for continuing to share what you've learned. :-)

I purchased this book for my friend Alex who was told he should get his things in order, and that short of a liver transplant there was nothing further that could be done. His family was witnessing his failing health and felt only helplessness and desperation as they knew he would not live long

enough for a transplant. I searched the internet until I found references to Lloyd Wright's book. After adopting the lifestyle changes to diet, and the supplementation (alpha-lipoic acid, milk thistle, proanthocyanidin and naringenin) described in this book, Alex has made a complete turn-a-round in his health. He no longer experiences his previous symptoms and looks healthier and more vibrant. What the future holds is a mystery, but it no longer looks so bleak. Hepatitis C - A Do-It-Yourself Guide for Health helps to teach that treatment of this disease has more options than Alex's doctors had led us to believe. This is a must read for anyone wishing to investigate and learn how to incorporate an alternative approach to current mainstream medicine's treatment of this disease.

This is an excellent resource. Having used the program w great success, I whole heartedly owe my life to Lloyd & his herbal products. Just try it.

Book about the most important things you need to know about success with hepatitis C. Thanks Lloyd for being there for people!

This book contains useful information for the management of hepatitis C. It lists and discusses alternatives to the "standard" interferon-ribavirin pharmaceutical treatment. The most controversial recommendations are glandular products from Natcell (thymus, adrenal, liver) sold exclusively by the author. A more reliable source for glandular products would be from US based Standard Process. The book reads more like notes rather than through discussions with references (the book does provide some references). Another recent and more useful book would be Hepatitis C Survival Secrets by Ralph Napolitano (sold by). The author does have many years of experience working with hepatitis C patients - and has helped thousands of people over the years. The book is worth reading for the author's perspective on hepatitis C management.

Great book,, very informational.

Just what I needed. Needed to know there was more info out there for treatment other than dangerous drugs they offer now. I found it to be very informative. Thanks for the good book.

This book is better than the authors first work. It is more serious in the approach. He gives good suggestions for those who do not trust medical doctors to help with the serois problem.
