Product Dimensions: 8 x 0.5 x 10 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

Best Sellers Rank: #3,748,214 in Books (See Top 100 in Books) #33 in [Books > Teens > Education & Reference > Science & Technology > Technology > Machinery & Tools](#) #128 in [Books > Teens > Education & Reference > Science & Technology > Technology > Air & Space Science](#) #609 in [Books > Teens > Education & Reference > History > Military](#)

Customer Reviews

Grade 7-9 — Military buffs will be delighted with this series, which could also serve as a reference work. The chronologically arranged titles devote a page to each weapon. A large-font title at the top of the page is followed by a one- or two-sentence statement concerning the subject's place in history, and is usually followed by a list that includes country of origin, crew, type, launch date and displacement (in Warships), range, and weight. The narratives describe why and when the type of vehicle was created, its advantages and disadvantages, when and where it served, countries that may have purchased or license-built it, and when it was removed from service. Each entry contains a detailed two-dimensional color drawing and black-and-white or color photo of the featured vehicle (sometimes, in the case of ships, photos portray a sister vessel); both are accompanied by extensive captions. Warships has a problem with a couple of questionable dates. The only general criticism of this series is that the text is crowded as there is often no space

between sentences. Back matter includes a listing of memorials and museums and an excellent further-reading list. A first purchase where the subject is popular. (c) Copyright 2010. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc. No redistribution permitted.

Another volume in Rosen Publishing's '101 Greatest Weapons of All Times,' 101 GREAT BOMBERS by Robert Jackson provide mini-bios, tech specs and illustrations of "101 of the world's finest bombers" operated over the years by various air forces. Although aimed at readers in grades 7-9, adults will enjoy the mix of data and pix. Arranged in rough chronological order, Jackson's book features all the usual suspects: Gothas, Vimys, Do 17s, B-17s, B-24s, SBDs, Ju 87s, Vals, IL-2s, Lancs, B-47s, Vulcans, A-4s, Jaguars, F-117s, etc. The bios are short and sweet, generally accurate as are the tech specs. Each aircraft rates a color profile - many of which are recycled Art Tech/Aerospace artwork - and a photograph, some of which are in color. Appendices include a glossary and sections on 'For More Information' and "For Further Reading." Most of the aircraft found in 101 GREATEST BOMBERS rate inclusion but I question a few. The Airco DH.9 was a disaster when introduced over the Western Front. The Vickers Vildebeest was slaughtered when used against the Japanese in 1941. The Battle was a failure; ditto the Manchester, He 177 and so on. In any case, if you're looking for a basic introduction to 'heavy metal,' 101 GREATEST BOMBERS will suffice. Recommended.
